

450-750 GHz Vector Network Analyzer Extension Module ***June 2008***

VDI is pleased to announce the development a 450-750 GHz vector network analyzer extension module, which has been fully tested with both Rhode & Schwartz and Agilent 4-port VNAs. Features include:

- >20uW transmit power over most of the band
- Simple turn-key operation
- High dynamic range, shown below:

Please visit the VDI booth at the MTT International Microwave Symposium for a demonstration with the Rhode & Schwartz ZVA-40.

Please contact VDI today for additional details.
