## **VDI Acquires Erickson Power Meter Business**

Virginia Diodes, Inc (VDI) has recently acquired the Erickson power meter business. Erickson Instruments LLC was founded in 2000 by Neal Erickson, a world leader in designs of submm frequency multipliers and other components. Its first product was a sensitive millimeter to submillimeter power meter, which has undergone many improvements over time and is now sold as the PM4. At this time the product line is marketed, produced, and sold by VDI. Please visit us [www.ericksoninstruments.com](http://www.ericksoninstruments.com).
