

New 25uW, 1.4-1.5 THz Frequency Extension Module (x96)

November 2005

This VDI 1.4-1.5 THz Frequency Extension Module is an all-solid-state design that produces approximately 10-30 uW of CW RF output power over the 1.4-1.5 THz Band. The Customer RF input is approximately 14.5-15.5 GHz with an 18dBm power level. The system includes an integrated RF output feedhorn and simple bias system.
